MULTIBiT®
multitasking
master

MULTIBiT® hybrid cable is a combination of five separate cables put together into one perfect solution. This type of construction allows to create five different installations in modern buildings.

When laying one cable you create one fiber optic, two LAN and two TV installations, what means reducing time and work to a minimum. The colours used make identification of every cable easy.

MULTI-POSSIBILITIES

1 **2 x BiTLAN®U/UTP cat. 5e**
- Structural LAN cabling
- Video and intercom network

2 **2 x BiTSAT®757**
- Digital terrestrial TV DVB-T, DVB-T2
- Satellite TV DVB-T(S)
- Cable TV DVB-C
- In line with PN-EN 50117-2-4, class A (aluminium backed polyester tape and aluminium wire braid with coverage min. 77%)

3 **1 x BiTfiber®FTTH 2J**
- Fiber optic installation

Cable designed in accordance with the Regulation of the Ministry of Transport, Construction and Maritime Affairs dated 06.11.2012, no. 1289
